

QSDR & 9000 SERIES

INSTRUCTIONS ON SETTING UP EMAIL NOTIFICATION:

1. Make sure the DVR firmware version is 090716 or newer
2. Make sure your DVR has been set for network and can be seen from internet.
3. On the DVR, we need to setup the motion recording first:
4. Go to menu - devices - motion. Turn on all the cameras and set to 2 or 3. Apply and exit
5. Go to menu - record and record set - time schedule and click on schedule and click on ALARM at the bottom (check mark), then make the box RED color all across the Sunday. Click on copy. Now all the DAY will be RED. Click Apply and Exit. DVR will record on Motion now.

6. Go to Menu - Network, and on DNS, you need to put your public DNS. Public DNS can be found in your Router status. Usually there are 2 DNS (dns1 and DNS2). Use DNS 1 only.

7. Go to Menu - Device - Alarm - Email setup: Example here for GMAIL account (recommended), if you don't have Gmail account, go www.gmail.com and sign up:

Turn ON email

SSL : ON

Port : 00465

smtp: smtp.gmail.com

Send email: youremail@gmail.com

Passwd: your password with gmail account

Recv email: youremail@yahoo.com (do not use gmail email)

Click Apply - OK - EXIT

You should be back to Alarm setting screen, click APPLY - OK - Exit.

Done.

It will take a while before the DVR sending email. (sometimes takes up to 1 hour)
If you still not receive email, login to your GMAIL account and go to Sent folder and look if there are emails being sent out. If you see there are emails being sent out, but if you still don't receive email, check your Junk folder, they might be going to the junk folder.
